

PRESS RELEASE – 06/12/2011

Carbon Market Data launches the CRC Database

Carbon Market Data is pleased to announce the launch of the [CRC Database](#), a new tool including information on the CRC Energy Efficiency Scheme. The CRC (Carbon Reduction Commitment) Energy Efficiency Scheme is a mandatory emissions trading scheme for the UK that aims to reduce carbon dioxide (CO₂) emissions through energy efficiency.

The [CRC Database](#) will enable users to:

- search information on the more than 2000 organisations included in the scheme
- access the performance league table 2010/11 ranking organisations through early action metrics
- discover the carbon footprint of some of the biggest UK organisations, totalling 61 MtCO₂
- view aggregated data by regulator (England and Wales, Northern Ireland, Scotland)
- search companies by location (town, postcode) and use the Google maps functionality

CRC organisations are responsible for around 10% of the UK's CO₂ emissions. The carbon footprint of these organisations in the fiscal year 2010/11 amounted to 61 MtCO₂.

The scheme features a range of reputational, behavioural and financial drivers, which aim to encourage organisations to develop energy management strategies that promote a better understanding of energy usage.

The first sale of allowances to cover emissions in fiscal year 2011/12 will be taking place in 2012.

The price of CRC allowances was set at £12 per tonne of carbon dioxide.

The CRC Database is part of the World ETS Database and is [freely accessible online](#). To discover the new CRC Database, please [register](#) on our website, then log into our [online data platform](#) and click on the CRC menu.

About the World ETS Database

The World ETS Database is freely accessible on the [Carbon Market Data company website](http://www.carbonmarketdata.com).

It includes information on the world's carbon trading schemes:

- EU Emissions Trading Scheme
- EEA carbon trading schemes: Liechtenstein and Norway
- Swiss emissions trading scheme
- Regional Greenhouse Gas Initiative (RGGI): 10 US States.
- California cap-and-trade scheme
- New Zealand emissions trading scheme
- EU ETS Aviation
- UK's CRC Energy Efficiency scheme
- CDM-JI trading market

The World ETS Database also includes corporate-level data on companies included in the EU emissions trading scheme.

Charts can be downloaded for free and included into reports and articles, along with the data source and web link <http://www.carbonmarketdata.com> .

About Carbon Market Data

Carbon Market Data provides carbon market research services and information systems to a wide range of organisations in the world, including financial institutions, power companies, oil & gas firms, energy-intensive industrial companies, trade associations and information providers.

Thanks to our unique information tools and expertise in the analysis of climate change regulations effects on company valuations, we help financial organisations to integrate the carbon factor into their financial models and investment decision process.

We also offer to carbon brokerage houses and information providers the possibility to include our data platforms into their intranet/extranet information systems.
